

Honors CHEMISTRY Summer Assignment: 2017

Congratulations on your decision to take Honors Chemistry. Your mission, if you choose to accept it, will be to complete the following assignments before the first day of school (**August 21, 2017**). The selection of questions and problems will serve the following objectives:

1. **Introduce** you to the basic expectations of Honors level chemistry in terms of student work.
2. **Completing** these assignments will introduce you to some of the basic concepts we use very frequently in chemistry.
3. **Your ability** to complete these assignments will demonstrate your level of **commitment**, as well as your **work ethic**, and will be your opportunity to impress upon me the type of student you are.

In terms of resources, you only need the internet and the resource videos I've posted in the Honors Chemistry Summer Google Classroom – the access code is dlj5ahg.

My expectation is that you will **consistently** work on these assignments all summer. Remember, 2 months isn't a very long time, so please, use your time wisely. These assignments are due by the 1st day of school. If you need to contact me during the summer, you may do so at enyonamakondo@cusd.com). Please be aware that I will only check and respond to emails on Fridays, with 6/30 and 7/7 being the exceptions. Have a great summer, and I look forward to seeing you in August.
